# OUTDOOR LIVING

WITH PERGOLAS FROM HELLA

**During the summer months, when we relocate our living space from indoors to outdoors, pergolas become real oases for well-being.**

HELLA pergolas represent a Mediterranean feeling and are an effective protection against rain, strong insolation and wind.

# PERGOLAS

Elegant sun shade, protection against sudden thundershower or simply a new room outdoors – pergolas bring the Mediterranean feeling of life and freedom into your garden and to your terrace.

# VENTUR

## BIOCLIMATIC PERGOLA

**VENTUR is the bioclimatic pergola with adjustable aluminium slats and a horizontal roof.** When closed the slats form an optimal rain shelter. When the roof is opened, in addition to the shade, a cooling draught is created. This way, the terrace becomes an oasis of well-being even on hot summer days. Optionally dimmable LED lighting provides a pleasant mood light in the evening hours. The sides of the pergola can be closed with the vertical blinds VENTUR SIDE and VENTUR SIDE M.

### BENEFITS

- Horizontal roofing
- Inclination of the slats from 0° to 120° for perfect shading and ventilation
- Discreetly hidden water drain via the columns
- Water drain integrated into the construction
- Combination of multiple modules possible
- Easy installation and maintenance
- Low space requirement for installation
- Available in standard colours according to HELLA Colour worlds

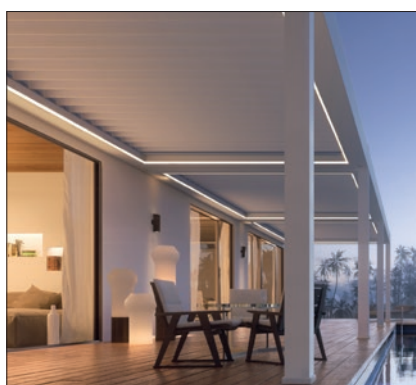

### OPTIONS

- LED lighting
- Integration of vertical blinds (VENTUR SIDE and VENTUR SIDE M)

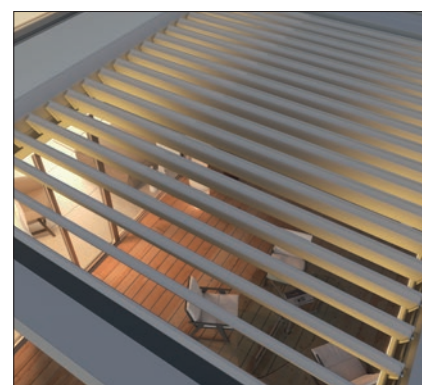

## DESIGN & QUALITY IN DETAIL

Closed slats provide protection,  
if the weather is not nice.

LED lighting in the frame  
lights up the space underneath the pergola  
with a comfortable light.

When opened, the slats create a pleasant  
draught and provide additional recreation.

Limit sizes [mm]	
Maximum width	4500
Maximum projection	6000

# VENTUR SIDE AND VENTUR SIDE M

## VERTICAL BLIND TO BE INTEGRATED INTO THE VENTUR

**Perfectly integrated, linear, with integrated roller tube and uncompromisingly functional.** This blind is purpose-built for the pergola VENTUR to shade the vertical spaces without affecting the visual appearance of the structure. Available in two designs, VENTUR SIDE and VENTUR SIDE M.

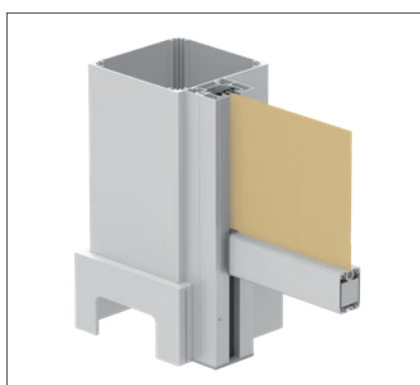

### VENTUR SIDE

- Integrated, without visible box
- Side seam guided cover
- Wind resistance up to 70 km/h
- Available in standard colours according to HELLA Colour worlds

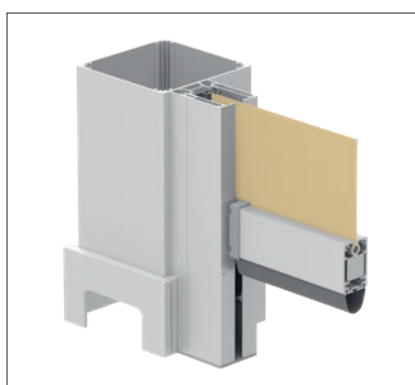

### VENTUR SIDE M

- Integrated, without visible box
- Side seam guided cover
- Automatic locking of the front rail
- Wind resistance up to 70 km/h
- Available in standard colours according to HELLA Colour worlds
